2.31 (e) (3)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

Section 2.31(e) A proposal to conduct an activity involving animals, or to make a significant change in an ongoing activity involving animals, must contain the following: (3) A complete description of the proposed use of the animals.

1. Review of Protocol DMAC30005-2008 that described a surgical procedure involving guinea pigs: The attached standard operating procedure stated that an adequate plane of anesthesia for the surgical procedure was indicated by an absence of reflexes. The records for 10 guinea pigs failed to document or provide evidence that reflexes were monitored to ensure an appropriate plane of anesthesia for the procedure. It could not be determined whether anesthetic monitoring was consistent with the procedures described in the proposal/standard operating procedure.

The Institutional Animal Care and Use Committee (IACUC) should ensure that an animal procedure is conducted as described in the approved animal care and use proposal to avoid or minimize discomfort, pain and/or distress to the animals, and to ensure the well-being of the animals.

Correct by: Future animal procedures.
