Name _____

Picture-Perfect Pickup

Sometimes people throw garbage on the ground or in the water. They may not mean any harm. But litter is harmful to animals and the earth. For example, animals can choke on plastic bags. Rivers can become clogged with trash. When you see trash, pick it up in a flash!

Clean up the park below. Circle everything that belongs in a trash can or recycling bin.

How many trash items did you find? Count them and write your number in this box. ☐

Choose one of the animals in the picture above. On the back, write three things you know about that animal.
