Wild Neighbors™ humane solutions to conflicts with wildlife

This stimulating and information-packed daylong seminar on urban wildlife will provide both professional and lay audiences with up-to-date and state-of-the-art information on the tools and techniques to resolve human-wildlife conflicts without displacing, injuring, or killing wild animals.

As humans encroach further and further into their habitat, and as wild animals become more tolerant of their human neighbors, conflicts inevitably occur – conflicts that can be resolved humanely.

Please join us for a day devoted to this topic. The strategies and approaches discussed are supplemented by informative and entertaining descriptions of the animals themselves, complementing information in The Humane Society of the United States book, *Wild Neighbors: The Humane Approach to Living with Wildlife*.
