ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Column E Explanation

1. Registration Number: 93-R-0026
2. Number of animals used in these studies: 2
3. Species (common name) of animals used in the study: Dogs
4. Explain the procedure producing pain and/or distress.

The study design included [REDACTED] after a wash out period if no adverse signs were observed during initial administration. The [REDACTED] from administration of the test article, at the [REDACTED] delivered, caused the dogs to fall into Category E.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

Treatment of pain or distress with an analgesic or other drug was not performed since the study design included [REDACTED] evaluation of blood samples at multiple times post dose. Use of an analgesic to alleviate pain or distress may have interfered with the [REDACTED] of the test article and ultimately interfered with the interpretation of the study results and assessment of the test article.

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):
