3.26 (d)

FACILITIES, INDOOR.

Sec. 3.26 Facilities, indoor. (d) Interior surfaces. The interior building surfaces of indoor housing facilities shall be constructed and maintained so that they are substantially impervious to moisture and may be readily sanitized.

Guinea Pig room: There are several small patches where the paint is missing or pealed off the sheet rock (on the left -south-wall). This is necessary to have the surface to be substantially impervious to moisture and may be readily sanitized. Implementing a maintenance program would ensure that repairs would be documented and completed in a timely manner.

To be corrected by January 10, 2010

3.131 (c)

SANITATION.

Sec. 3.131 Sanitation. (c) Housekeeping. Premises (buildings and grounds) shall be kept clean and in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this subpart. Accumulations of trash shall be placed in designated areas and cleared as necessary to protect the health of the animals.

Pen # 02 and #11 Goat Pen: The feed bunks, on the right side, there is split board of about 1/2 inch wide and the length of the side. These areas are to have integrity to keep the feed in and to prevent possible contamination. This is important to maintain a healthy environment for the animals. This is needed to facilitate the prescribed husbandry practices and to protect the health of the animals..

To keep the feed bins in tact, a program of regular maintaince would keep the area repaired.

To be corrected by January 10, 2009.

3.56 (c)

SANITATION.

73.56 Sanitation. (c) Housekeeping. Premises (buildings and grounds) shall be kept clean and in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this subpart. Premises shall remain free of accumulations of trash.

Rabbit Building One: On north side of the building: One window is broken and two windows are missing. One of the missing window areas has an old feed sack covering it. Windows need to be in present and in good repair so air flow can be adjusted and maintained. Also, properly maintained windows will keep out potential predators, rodents, etc.

To be corrected by February 23, 2008

3.125 (a)

FACILITIES, GENERAL.

73.125 Facilities, general. a) Structural strength. The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

Goat Barn: Pen 7: A "kick board" at the bottom of the door to pen 07 was detached from the bottom of the entry door. It was lying on the ground.

This was corrected during the inspection

Goat Barn: Pen 5: A screw is missing on one of the gate latches assemblies (where the latch locks onto the building). These repairs are needed to prevent possible escape and possible injury to the animals.

Inspection Report

TO BE CORRECTED BY: January 29, 2008

3.125 (d)

FACILITIES, GENERAL.

?3.125 Facilities, general. (d) Waste disposal. Provision shall be made for the removal and disposal of animal and food wastes, bedding, dead animals, trash and debris. Disposal facilities shall be so provided and operated as to minimize vermin infestation, odors, and disease hazards. The disposal facilities and any disposal of animal and food wastes, bedding, dead animals, trash, and debris shall comply with applicable Federal, State, and local laws and regulations relating to pollution control or the protection of the environment.

Goat Food Storage Area (North end of barn): A wheel barrow full of old food was present. There was approximately ? bucket of old food scattered around on the ground.

Front Goat Barn pathway: About a ? bucket of old feed was scattered about in front of the pens on the sidewalk.

This was corrected during inspection.

3.127 (c)

FACILITIES, OUTDOOR.

? 3.127 Facilities, outdoor. (c) Drainage. A suitable method shall be provided to rapidly eliminate excess water. The method of drainage shall comply with applicable Federal, State, and local laws and regulations relating to pollution control or the protection of the environment.

Goat Barn: yard area behind pen #1- pen #7: There is a depression accumulating water during the rain storms. It is approximately 50 feet long and 15 feet wide. There are several smaller holes with water in them. There is no method to rapidly drain the water from the various holes. A temporary fix would be to dig a drainage ditch to the other drainage ditch near by. A more permanent fix (in the summer) is to bring in fill and slope the area so it drains properly

Temporary fix to be completed by January 28, 2008

3.129 (a)

FEEDING.

Inspection Report

? 3.129 Feeding. (a) The food shall be wholesome, palatable, and free from contamination and of sufficient quantity and nutritive value to maintain all animals in good health. The diet shall be prepared with consideration for the age, species, condition, size, and type of the animal. Animals shall be fed at least once a day except as dictated by hibernation, veterinary treatment, normal fasts, or other professionally accepted practices.

Goat Barn: Pen #8: Salt block on the ground with fecal material underneath and around it. The block needs to be in a rack off the ground so it isn't soiled.

This was corrected during inspection.

Goat Barn: All feed bunkers need to be checked for chicken feces. Occasional droppings were found on the pelleted feed. Nutritious clean uncontaminated feed is important to maintain the health of the animals.

TO BE CORRECTED BY: January 25, 2008

3.131 (a)

SANITATION.

? 3.131 Sanitation. (a) Cleaning of enclosures. Excreta shall be removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors. When enclosures are cleaned by hosing or flushing, adequate measures shall be taken to protect the animals confined in such enclosures from being directly sprayed with the stream of water or wetted involuntarily.

Goat Barn: With the wet weather, the stall areas need to be cleaned more often. This is to prevent the fecal buildup. There are areas of caked fecal material (Pen # 5 and Pen #9 are examples). The periodic cleaning is necessary to help prevent the spread of parasites and disease organisms. This is necessary to maintain a healthy environment for the animals.

There are areas of caked fecal material (Pen # 5 and Pen #9 are examples). The periodic cleaning is necessary to help prevent the spread of parasites and disease organisms. This is necessary to maintain a healthy environment for the animals.

TO BE CORRECTED BY: January 29, 2008

3.131 (d)

SANITATION.

3.131 Sanitation. (d) Pest control. A safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained.

Goat Barn: Two loose chickens were observed in Pen #10 (actually, they were moving from pen to pen). These birds were observed eating the food in the area and had left fecal droppings in the feed bunks. Removal of the birds and the fecal material from the feed bunks is necessary to prevent contamination and potential illness in the animals.
