### 2.40 (a)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(a) Each dealer or exhibitor shall have an attending veterinarian who shall provide adequate veterinary care to its animals in compliance with this section.

Guinea Pigs have been at this facility for approximately one year and have not been included in the written program of veterinary care. One of the guinea pigs was identified with a lesion on the cornea and no records of veterinary care were available, although medication was being administered to treat the eye, no medication was available or present during this inspection.

All animals when injured must have the veterinarian's involvement in the care and treatment of medical problems.

Correct by August 1, 2008.

### 2.40 (b) (2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care;

The Guinea Pig with the corneal lesion was being treated according the manager but no medication was available to treat the eye. Appropriate methods must be available to prevent , control and diagnose injuries and diseases in animals.

Correct by August 1, 2008.

### 3.50 (a)

#### FACILITIES, GENERAL.

(a) Structural strength. Indoor and outdoor housing facilities for rabbits shall be structurally sound and shall be maintained in good repair, to protect the animals from injury, to contain the animals, and to restrict the entrance of

other animals.

**3.51** (b)

### **FACILITIES, INDOOR.**

(b) Ventilation. Indoor housing facilities for rabbits shall be adequately ventilated to provide for the health and comfort of the animals at all times. Such facilities shall be provided with fresh air either by means of windows, doors, vents, or air conditioning and shall be ventilated so as to minimize drafts, odors, and moisture condensation. Auxiliary ventilation, such as exhaust fans and vents or air conditioning, shall be provided when the ambient temperature is 85 °F. or higher.

Temperature in the west rabbit room is monitored by a high / low thermometer with readings taken in the mornings at approximately 0900 AM.. Temperature records indicated the high temperature between June 8- June 14 as being over 86-94 degrees. If current auxillary ventilation is not able to maintain the ambient temperature below that of 85, other methods must be employed to maintain temperatures at or below 85 degrees.

Correct by August 1, 2008.
