2.31 (c) (7) **DIRECT NCI**
INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

Section 2.31 Institutional Animal Care and Use Committee (IACUC) (c) IACUC Functions. With respect to activities involving animals, the IACUC, as an agent of the research facility, shall: (7) Review and approve, require modifications in (to secure approval), or withhold approval of proposed significant changes regarding the care and use of animals in ongoing activities.

An IACUC approved protocol describes a procedure in which the total volume of blood to be withdrawn will be no more than 7ml per Kilogram body weight per month. The amount of blood collected from 20 rabbits out of 24 rabbits total; exceeded the maximum blood volume approved by the IACUC by varying degrees. The collection of disproportionate amounts of blood and/or to disregard the IACUC approved procedures may adversely affect the health and well-being of the animals on study. After the IACUC has approved a protocol, it has a responsibility to make certain that procedures are carried out as described in the protocol. Following review of ongoing activities, the IACUC may approve changes, require modification of proposed changes, or withhold approval of proposed changes before they are implemented. In doing this, the IACUC can establish a climate of compliance. A system which would ensure that procedures aren't changed without prior approval should be implemented.
