2.31 (c) (3)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

(3) Prepare reports of its evaluations conducted as required by paragraphs (c)(1) and (2) of this section, and submit the reports to the Institutional Official of the research facility; Provided, however, That the IACUC may determine the best means of conducting evaluations of the research facility's programs and facilities; and Provided, further, That no Committee member wishing to participate in any evaluation conducted under this subpart may be excluded. The IACUC may use subcommittees composed of at least two Committee members and may invite ad hoc consultants to assist in conducting the evaluations, however, the IACUC remains responsible for the evaluations and reports as required by the Act and regulations. The reports shall be reviewed and signed by a majority of the IACUC members and must include any minority views. The reports shall be updated at least once every six months upon completion of the required semiannual evaluations and shall be maintained by the research facility and made available to APHIS and to officials of funding Federal agencies for inspection and copying upon request. The reports must contain a description of the nature and extent of the research facility's adherence to this subchapter, must identify specifically any departures from the provisions of title 9, chapter I, subchapter A--Animal Welfare, and must state the reasons for each departure. The reports must distinguish significant deficiencies from minor deficiencies. A significant deficiency is one which, with reference to Subchapter A, and, in the judgment of the IACUC and the Institutional Official, is or may be a threat to the health or safety of the animals. If program or facility deficiencies are noted, the reports must contain a reasonable and specific plan and schedule with dates for correcting each deficiency. Any failure to adhere to the plan and schedule that results in a significant deficiency remaining uncorrected shall be reported in writing within 15 business days by the IACUC, through the Institutional Official, to APHIS and any Federal agency funding that activity;

The IACUC program reviews and facility inspections do not contain a specific plan or schedule for correcting each deficiency. Reports must meet the above criteria to be in compliance with the regulations.

Correct by June 1, 2007

Inspection Report

2.38 (b) (1) (ii) REPEAT

MISCELLANEOUS.

(iv) To inspect the facilities, property, and animals, as the APHIS officials consider necessary to enforce the provisions of the Act, the regulations, and the standards in this subchapter;

I was escorted to the 8 th floor animal facility and began the inspection of the animal facility. After several minutes of the inspection I was told to stop the inspection until another individual could be located to lead the tour. I then departed the animal facility and went across campus to review IACUC records. After reviewing records I returned to the animal facility located on the otherside of campus to complete inspection of animal rooms and other areas. After the inspection of the animal facility, I went back across campus to review IACUC records not located at the animal facility. Research facilities are not allowed to dictate the inspection process or stop the process and ask the inspector to leave. The unannounced inspection must occur in order to evaluate the facility as it is at the moment the inspector arrives.

Inspection reports dated May 5, 2005 and April 27, 2006 identified similar violations of the Animal Welfare Act at this facility. A response was sent to the regional office by the institution for each of those inspections explaining why it was difficult to comply with the regulations.
