Type: ROUTINE INSPECTION

Date: May-06-2008

2.33 (b) (2) **REPEAT**

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

*** (b) Each research facility shall establish and maintain programs of adequate veterinary care that include: (2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries. ***

The following expired medical materials were found commingled among non-expired materials during the inspection: Nine boxes of BD vacuutainer tubes (100s each) expired on April, 2008; sterile water (2000 ml) expired on Apr, 2008; Propoflo (2 vials of 20 mls each) expired on Feb, 2008; dexon II sutures (1) expired on Dec, 2006 and cimetidine (2 mls) expired on May 1st, 2008. Medical materials are often imprinted with an expiration date, beyond which the manufacturer does not guarantee the safety or stability of the item. The use of outdated medical materials is undesirable, as these materials may lose their potency or degrade to toxic byproducts if stored after the expiration date, resulting in unpredictable outcomes. All expired medical materials must be identified and properly disposed of or properly labeled and stored in an area separate from nonexpired medical materials. A system which would ensure that the expired items are identified and handled accordingly on a regular basis is required. This item was corrected during the inspection.

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

*** (b) Each research facility shall establish and maintain programs of adequate veterinary care that include: (2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries. ***

The following expired medical materials were found commingled among non-expired materials during the inspection: Three packages of Ethilon nylon suture material which expired on January, 2006 and 63 CPT blood collection tubes which expired on October, 2006. Medical materials are often imprinted with an expiration date, beyond which the manufacturer does not guarantee the safety or stability of the item. The use of outdated medical materials is undesirable, as these materials may lose their potency or degrade to toxic byproducts if stored after the expiration date, resulting in unpredictable outcomes. All expired medical materials must be identified and properly disposed of or properly labeled and stored in an area separate from non-expired medical materials. A system which would ensure that the expired items are identified and handled accordingly on a regular basis is required. This item was corrected during the inspection.
