### 3.1 (e)

#### HOUSING FACILITIES, GENERAL.

Location: Sacramento, CA

Sec. 3.1 Housing facilities, general. (e) Storage. Supplies of food and bedding must be stored in a manner that protects the supplies from spoilage, contamination, and vermin infestation. The supplies must be stored off the floor and away from the walls, to allow cleaning underneath and around the supplies. Foods requiring refrigeration must be stored accordingly, and all food must be stored in a manner that prevents contamination and deterioration of its nutritive value. All open supplies of food and bedding must be kept in leakproof containers with tightly fitting lids to prevent contamination and spoilage. Only food and bedding that is currently being used may be kept in the animal areas. Substances that are toxic to the dogs or cats but are required for normal husbandry practices must not be stored in food storage and preparation areas, but may be stored in cabinets in the animal areas

There was one open box of dog treats (15#) . It needs to be in a closed container to help prevent contamination and vermin infestation. For the well being of the animals, food stuffs need to be in closed container to prevent contamination, and provide a healthy food for the animals.

This was corrected at the time of inspection.

"This is a transcribed copy of the original inspection report."

**2.38** (g) (1)

**MISCELLANEOUS.**

Location: Citrus Heights , CA

Sec. 2.38 Miscellaneous.(g) Identification of dogs and cats. (1) All live dogs or cats, including those from any exempt source, delivered for transportation, transported, purchased or otherwise acquired, sold, or disposed of by a research facility, shall be identified at the time of such delivery for transportation, purchase, sale, disposal, or acquisition in one of the following ways:

- (i) By the official tag or tattoo which was affixed to the animal at the time it was acquired by the research facility, as required by this section; or
- (ii) By a tag, tattoo, or collar, applied to the live dog or cat by the research facility and which individually identifies the dog or cat by number.

Four cats do not have any identification. This is important so the source of the animals can be determined to be from acceptable sources.

This was corrected at the time of inspection.

"This is a transcribed copy of the original inspection report."

SACRAMENTO, CA 95826

Date: Sep-10-2007

Sec. 2.30 Registration: (a) Requirements and procedures.

(1) Each research facility other than a Federal research facility, shall register with the Secretary by completing and filing a properly executed form which will be furnished, upon request, by the AC Regional Director. The registration form shall be filed with the AC Regional Director for the State in which the research facility has its principal place of business, and shall be updated every 3 years by the completion and filing of a new registration form which will be provided by the AC Regional Director. Except as provided in paragraph (a)(2) of this section, where a school or department of a university or college uses or intends to use live animals for research, tests, experiments, or TEACHING, the university or college rather than the school or department will be considered the research facility and will be required to register with the Secretary. An official who has the legal authority to bind the parent organization shall sign the registration form.

(2) In any situation in which a school or department of a university or college demonstrates to the Secretary that it is a separate legal entity and its operations and administration are independent of those of the university or college, the school or department will be registered rather than the university or college.

(3) A subsidiary of a business corporation, rather than the parent corporation, will be registered as a research facility unless the subsidiary is under such direct control of the parent corporation that the Secretary determines that it is necessary that the parent corporation be registered to effectuate the purposes of the Act.

(b) Acknowledgment of regulations and standards. APHIS will supply a copy of the regulations and standards in this subchapter with each registration form. The research facility shall acknowledge receipt of and shall agree to comply with the regulations and standards by signing a form provided for this purpose by APHIS, and by filing it with the AC Regional Director.

Western Career College are using covered species in teaching. It has been determined by the Regional Office that these facilities need to be registered. It is important that the animals health and well being to

**2.38** (b) (1) (ii)

### MISCELLANEOUS.

Sec. 2.38 Miscellaneous. (b) Access and inspection of records and property. (1) Each research facility shall, during business hours, allow APHIS officials: (i) To enter its place of business; (ii) To examine records required to be kept by the Act and the regulations in this part (iii) To make copies of the records; (iv) To inspect the facilities, property, and animals, as the APHIS officials consider necessary to enforce the provisions of the Act, the regulations, and the standards in this subchapter; and (v) To document, by the taking of photographs and other means, conditions and areas of noncompliance.

The facility was not able to locate the acquisition and disposition records. A system needs to be in place to have access to the records required by the act. This is necessary for assuring that the animals are properly cared for, and the research or teaching being done on the animals, meets the regulations of the Animal Welfare Act. A person knowing where the records are, needs to be available, so the inspector can do the inspection.

### 2.31 (c)

#### INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

(c) IACUC Functions. With respect to activities involving animals, the IACUC, as an agent of the research facility, shall: (1) Review, at least once every six months, the research facility's program for humane care and use of animals, using title 9, chapter I, subchapter A--Animal Welfare, as a basis for evaluation; (2) Inspect, at least once every six months, all of the research facility's animal facilities, including animal study areas, using title 9, chapter I, subchapter A-Animal Welfare, as a basis for evaluation; Provided, however, That animal areas containing free-living wild animals in their natural habitat need not be included in such inspection;

The records provided did not have a recent program review or facility inspection in the packet. The last program review and facility inspection were conducted in February 2008. These are supposed to be conducted every 6 months as described in the above section of the regulations.

Correct by October 1, 2008.

### 2.31 (d) (5)

#### INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

(d) IACUC review of activities involving animals. (5) The IACUC shall conduct continuing reviews of activities covered by this subchapter at appropriate intervals as determined by the IACUC, but not less than annually

The protocols reviewed during the inspection were last updated in 2006. The IACUC is required to conduct continuing reviews of activities covered by this subchapter including the review of animal use protocols not less than annually.

Correct by October 1, 2008.

**2.33** (b) (2)

### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

\*\*\*(b) Each research facility shall establish and maintain programs of adequate veterinary care that include:(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries.\*\*\*

During the inspection, the following expired medical materials were identified commingled with non-expired materials. Expired materials included Heparin vials 10 mls (5) and 30 mls (4) (expired as of 9/2007), Ivermectin 0.01% oral suspension (7) (expired as of 07/2007), Isoflurane 250 mls (expired as of 11/2007), Vacuutainer tubes 4 mls (17 tubes) (expired as of 05/2007), ACT tubes 4 mls (7) (expired as of 11/2007) and biosyn suture material (4) (expired as of 09/2002). The use of expired medical materials on regulated animals does not constitute adequate veterinary care as required by the above regulation of Animal Welfare Act. The manufacturer does not guarantee the stability of the medical materials beyond its expiration date. These materials when commingled with non-expired materials increase the chances of health hazards to animals. Expired medical materials may degrade to toxic by products and may harm the animals if used on them. A system must be in place to ensure that all expired medical materials be identified, labeled and stored in an area separate from the non-expired medical materials or properly disposed of on a regular basis.

These items were corrected at the time of inspection.
