**2.31** (c) (7)

### **INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).**

(c) IACUC functions. With respect to activities involving animals, the IACUC, as an agent of the research facility, shall:

(7) Review and approve, require modifications in (to secure approval), or withhold approval of proposed significant changes regarding the care and use of animals in ongoing activities;

Protocol #08-310, as approved, states that a device will be surgically implanted subcutaneously in the lower abdomen in the rabbits under this study. The device has actually been placed subcutaneously in the scapular region in the rabbits under this protocol. Although the actual placement of the device in the scapular area has been beneficial to the animals, the procedure was not accurately described in the protocol and has not been given IACUC approval. This modification, a significant change regarding the use of the animals, must be approved by the IACUC prior to implementation.

Correct by: Immediate.
