

## Inspection Report

LOUISIANA STATE UNIVERSITY SYSTEM

Customer ID: 1484

Certificate: 72-R-0003

Site: 001

RESEARCH FACILITIES

LOUISIANA STATE UNIVERSITY SYSTEM

3810 WEST LAKESHORE DRIVE

Type: ROUTINE INSPECTION

BATON ROUGE, LA 70808

Date: Aug-26-2009

### 3.127 (b)

#### FACILITIES, OUTDOOR.

(b) Shelter from inclement weather. Natural or artificial shelter appropriate to the local climatic conditions for the species concerned shall be provided for all animals kept outdoors to afford them protection and to prevent discomfort to such animals. Individual animals shall be acclimated before they are exposed to the extremes of the individual climate.

Approximately 20 horses being held at the Brightside location for use on teaching and/or research protocols at the LSU Veterinary School have no shelter other than trees in pasture. Facility must provide adequate shelter including a roof and adequate wind and rain breaks to allow all horses in the pasture to have shelter.

Approximately 30 horses also on teaching and/or research protocols housed at Central Facility have inadequate shelters ranging from roofed shelters with no walls to shade cloth shelters. Horses must be provided shelters including roofs and adequate wind and rain breaks to allow all horses to be sheltered from rain and wind.

Facility must provide compliant housing by 11-26-09.

### 3.130

#### WATERING.

If potable water is not accessible to the animals at all times, it must be provided as often as necessary for the health and comfort of the animal. Frequency of watering shall consider age, species, condition, size, and type of the animal. All water receptacles shall be kept clean and sanitary.

Water in large outdoor troughs is green with algal growth.

This water is no longer potable and could lead to disease in horses.

Facility must keep these troughs clean and free of algae or institute a compliant method of providing clean, potable water.

#### Prepared By:

LYNN P BOURGEOIS, D.V.M. USDA, APHIS, Animal Care

Date:

Title: VETERINARY MEDICAL OFFICER Inspector 4002

Aug-28-2009

#### Received By:

Date:

Title:

Aug-28-2009

## Inspection Report

---

Correct by 9-5-09.

### 3.131 (a)

#### SANITATION.

(a) Cleaning of enclosures. Excreta shall be removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors. When enclosures are cleaned by hosing or flushing, adequate measures shall be taken to protect the animals confined in such enclosures from being directly sprayed with the stream of water or wetted involuntarily.

Stalls at Brightside which are used to temporarily house horses have accumulations of old fecal material indicative of extremely infrequent cleaning.

This could lead to disease transmission in the horse herd.

Stalls need to be cleaned and kept clean.

Correct by 9-5-09.

Feed bunk along back wall of the stable contains a mixture of water and old feed.

This serves as a reservoir for pathogens.

This bunk must be cleaned and kept clean or filled in with concrete.

Correct by 9-5-09.
