2.31 (e) (5)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

A proposal to conduct an activity involving animals, or to make a significant change in an ongoing activity involving animals, must contain the following.

(5) A description of any euthanasia method to be used.

1) Protocol # 2007-01 lists CO2 asphyxiation as the method of euthanasia in guinea pigs. However the actual cause of death may be exsanguination because the heart is still beating when a terminal blood collection is made. Clarification of the method of euthanasia is important to the welfare of the animals.

Correct by 7/1/08.
