2.33 (b) (3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

2.33 (b) (3) - "Each research facility shall establish and maintain programs of adequate veterinary care that include:
(3) Daily observation of all animals to assess their health and well-being; Provided, however, That daily observation of animals may be accomplished by someone other than the attending veterinarian; and Provided, further, That a mechanism of direct and frequent communication is required so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed to the attending veterinarian."

1. On 2/12/07 two of the three Cotton Rats housed in an enclosure were found dead and the food receptacle was empty. The death of the two animals was attributed to a lack of food. Personnel noted the surviving Cotton Rat to be dehydrated, hunched, and have a rough hair coat but failed to inform the Clinical Veterinarian of the animal's condition.

After learning of the incident from an anonymous source on 2/13/07, the IACUC informed the Clinical Veterinarian. The surviving Cotton Rat was treated and fully recovered.

The IACUC conducted an investigation of events pertaining to the incident. As a result of the investigation, personnel connected with the incident was/were disciplined and was/were given additional supervision. In addition, the IACUC has implemented several measures to ensure that another incident does not occur.

The research facility informed the USDA of the incident on 4/13/07. The facility has undertaken corrective actions and has addressed this item.
