Date: Sep-11-2007

3.1 (b)

HOUSING FACILITIES, GENERAL.

(b) Condition and site. Housing facilities and areas used for storing animal food or bedding must be free of any accumulation of trash, waste material, junk, weeds, and other discarded materials. Animal areas inside of housing facilities must be kept neat and free of clutter, including equipment, furniture, and stored material, but may contain materials actually used and necessary for cleaning the area, and fixtures or equipment necessary for proper husbandry practices and research needs.

In the clean wash cage room several items from the maintenance room, janitorial room, primary enclosures on the floor, food and water receptacles in plastic containers were stowed resulting in clutter. It was explained to management the need to store each item in a designated area to prevent clutter.

TO BE CORRECTED BY: 09/16/07.

3.11 (b) (3) (ii)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

3) Hard surfaces of primary enclosures and food and water receptacles must be sanitized using one of the following methods:

(ii) Washing with hot water (at least 180 deg. F (82.2 deg. C)) and soap or detergent, as with a mechanical cage washer.

The cage wash records indicated that the highest temperature reached was 145 deg. F. The required washing with hot water temperature is at least 180 deg. F. This noncompliant item was pointed out for correction. Maintenance department was contacted.

TO BE CORRECTED BY: 10/11/07.

Inventory: 30-rabbits, 30-cats and 217-hamsters.

The last routine inspection and exit review were conducted on 07/18/06. This routine inspection and exit review were conducted with management and USDA VMO, Earnest Johnson.
