### 2.33 (b) (1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

(b) Each research facility shall establish and maintain programs of adequate veterinary care that include:

(1) The availability of appropriate facilities, personnel, equipment, and services to comply with the provisions of this subchapter;

In room # 7027, the terminal sheep room, there was an expired bottle of Survanta in the refrigerator. It was lot number 27 935Z7, expiration date 1 Sept., 2006.

It is important to the health and well-being of the animals to use current dated pharmaceuticals.

The expired pharmaceutical should be so labeled as "expired - do NOT use on covered species" and placed in an area where there is less likely a probability that it might inadvertently be used during an animal procedure. The product was removed during the inspection.

This inspection and exit interview occurred with the Director of Veterinary Services.
