3.56 (c)

SANITATION.

(c) Housekeeping. Premises (buildings and grounds) shall be kept clean and in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this subpart. Premises shall remain free of accumulations of trash.

***There is a fish area adjoining the feed storage area that is in disarray. There are dirty tanks, empty tanks with standing water, assorted chemicals and other items and debris scattered throughout the room. This is a serious hazard to the animals throughout the facility as a breeding ground for assorted insects and a source of contamination for the feed.

This facility is planning to house rabbits for a new protocol. This needs to be cleaned up prior to housing rabbits in this facility. This is necessary for their health and well being.

2.31 (c) (3)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

(3) Prepare reports of its evaluations conducted as required by paragraphs (c)(1) and (2) of this section, and submit the reports to the Institutional Official of the research facility; Provided, however, That the IACUC may determine the best means of conducting evaluations of the research facility's programs and facilities; and Provided, further, That no Committee member wishing to participate in any evaluation conducted under this subpart may be excluded. The IACUC may use subcommittees composed of at least two Committee members and may invite ad hoc consultants to assist in conducting the evaluations, however, the IACUC remains responsible for the evaluations and reports as required by the Act and regulations. The reports shall be reviewed and signed by a majority of the IACUC members and must include any minority views. The reports shall be updated at least once every six months upon completion of the required semiannual evaluations and shall be maintained by the research facility and made available to APHIS and to officials of funding Federal agencies for inspection and copying upon request. The reports must contain a description of the nature and extent of the research facility's adherence to this subchapter, must identify specifically any departures from the provisions of title 9, chapter I, subchapter A--Animal Welfare, and must state the reasons for each departure. The reports must distinguish significant deficiencies from minor deficiencies. A significant deficiency is one which, with reference to Subchapter A, and, in the judgment of the IACUC and the Institutional Official, is or may be a threat to the health or safety of the animals. If program or facility deficiencies are noted, the reports must contain a reasonable and specific plan and schedule with dates for correcting each deficiency. Any failure to adhere to the plan and schedule that results in a significant deficiency remaining uncorrected shall be reported in writing within 15 business days by the IACUC, through the Institutional Official, to APHIS and any Federal agency funding that activity;

****The semiannual inspections of the facility and policies of the facility was last completed November 6, 2006. There was no report completed reflecting the results of these evaluations and including all of the requirements listed above. It needs to include any minority views and must be signed by a majority of the IACUC. This must be completed immediately to properly complete the inspections conducted.

****The May 6, 2007 inspection and facility review has not been accomplished as of this date. This must be completed immediately and the inspection reports and semiannual report to the Institutional Official prepared promptly to remain in compliance and meet all of the requirements of the Animal welfare Act.
