3.51 (d)

FACILITIES, INDOOR.

(d) Interior surfaces. The interior building surfaces of indoor housing facilities shall be constructed and maintained so that they are substantially impervious to moisture and may be readily sanitized.

***There are areas in the new room that is to be used to house and prep rabbits for surgery that require treatment to be substantially impervious to moisture and readily sanitized.

These areas are as follows: The wide open areas between the floor tiles

The opening in the ceiling around the pipes

The rough, unsealed concrete area by the one set of pipes

and the wet open area in the floor by the other set of pipes.

All of these items must be corrected to make this area substantially impervious to moisture and readily sanitizeable.

This is necessary for the health and well being of the rabbits.

Correct by: Prior to use for housing rabbits
