Certificate: 91-B-0078

Site: 001

SNBL USA LTD

6605 MERRILL CREEK PARKWAY

Type: ROUTINE INSPECTION

EVERETT, WA 98203

Date: Aug-11-2009

2.40 (b) (5)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:

(5) Adequate pre-procedural and post-procedural care in accordance with established veterinary medical and nursing procedures.

MULTIPLE SEDATED/ANESTHETIZED ANIMALS WERE OBSERVED LYING ON THE EXPOSED METAL FLOORS OF THEIR ENCLOSURES. THE ANIMALS WERE WITHOUT ADEQUATE THERMOREGULATORY SUPPORT AND WERE NOT BEING MONITORED ADEQUATELY, THUS INCREASING THEIR RISK OF EXPERIENCING PROBLEMS DURING THEIR RECOVERY.

TO BE CORRECTED: AUG 14, 2009

3.80 (a) (2)

REPEAT

PRIMARY ENCLOSURES.

(ii) Protect the nonhuman primates from injury;

(viii) Provide the nonhuman primates with easy and convenient access to clean food and water;

(xi) Provide sufficient space for the nonhuman primates to make normal postural adjustments with freedom of movement.

DURING THIS INSPECTION TWO NHP CAGES WERE OBSERVED TO HAVE THE SQUEEZE APPARATUS RELEASED. THIS DIMINISHES AVAILABLE FLOOR SPACE FOR THE ANIMAL AND PROHIBITS THE ANIMAL ACCESS TO ITS WATER SOURCE, THUS RESULTING IN DISTRESS AND/OR POTENTIAL INJURY TO THE ANIMALS.

THIS NON-COMPLIANCE HAS BEEN DOCUMENTED ON SEVERAL PREVIOUS INSPECTION REPORTS AND SHOULD NOT CONTINUE TO BE AN ISSUE.

3.75 (a)

HOUSING FACILITIES, GENERAL.

3.75 Housing facilities, general.

(a) Structure: construction. Housing facilities for nonhuman primates must be designed and constructed so that they are structurally sound for the species of nonhuman primates housed in them. They must be kept in good repair, and they must protect the animals from injury, contain the animals securely, and restrict other animals from entering.

The corner of the chainlink fencing on the top of the outside run of the 2nd enclosure in building 2 is loosening from its attachment to the building . The non human primates were observed bouncing off the top of the enclosure which caused this area to bow. This area needs to be repaired to ensure that the animals are protected from injury and do not escape the enclosure.

There were also sharp points observed on many of the metal wires which secure the chainlink fencing to the support poles of the enclosures. These sharp wires are potential areas for injury to the non human primates. All enclosures need to be checked for sharp points on wires and these removed to protect the non human primates from injury.

Correct By : 12- 27 -07

The inspection was conducted with SNBL attending veterinarian , colony managers and Drs. Pannill and Johnson - USDA
