### Column E Explanation

This form is intended as an aid to completing the Column E explanation. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

1. Registration Number: 35-R-0029
2. Number of animals used in this study: 1
3. Species (common name) of animals used in the study: Dog
4. Explain the procedure producing the pain and/or distress.

The study investigated the effect of a potent anti-oxidant and anti-inflammatory compound on radiation sickness. The abdomen of the anesthetized dog was exposed to an irradiator device. Mild radiation sickness including some vomiting and diarrhea was an expected outcome, and palliative therapy for these symptoms was included in the approved animal care protocol. Euthanasia was planned in the event symptoms became severe. In this case, the animal was observed to be prostrate, lethargic, and in respiratory distress during morning animal care rounds 5 days after the irradiation procedure. The on-call veterinarian was contacted immediately; however, the animal rapidly expired before the veterinarian arrived to render a diagnosis and treatment.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

Alleviation of pain/distress was not purposefully withheld.

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):
