

# Help These Pets Find Forever Homes!

Imagine you are volunteering at an animal shelter. Your task is to write bios of animals up for adoption. Give each pet a name and include positive comments about each animal. Use adjectives to describe the animals. Also offer two care instructions on each card (below and on the right). The first one is done for you.

🐾 Cats are safest when kept indoors.

- 🐾 All animals need a healthful diet and exercise.
- 🐾 Large dogs need lots of room to exercise.
- 🐾 Rabbits do not like being picked up.
- 🐾 Dogs should be part of the family, not left outdoors on a chain.
- 🐾 Guinea pigs need clean hay every day.
- 🐾 All animals need love and attention.
- 🐾 Older dogs make great pets. They're usually calmer and may be housetrained.

## Meet some of our animals up for adoption!

Hello! My name is Shiloh! I am a 1.5 year-old spayed female. I have been here at the shelter for a while, waiting for my forever home. I am looking for a patient, ACTIVE owner who can provide me with lots of exercise! I'd REALLY love a fenced-in yard where I could run and play with you.

Go online and find your local animal shelter's Web site. Read the descriptions of their animals up for adoption. What information is given? How do the descriptions make you feel? Is there anything you would change?
