

The Saltwater Life

The animals below all live in salt water. When oceans are polluted, these animals can get hurt or even die. We need to protect our

oceans and keep them clean! Find the names of these ocean animals in the word search puzzle below.

clam cod crab dolphin eel fish jellyfish krill lobster manatee mussel
ray sea otter sea turtle seal shark shrimp snail sole squid whale

Oil spills are a big problem in our oceans, damaging fish, wildlife, and beaches. Some people say that if we used less oil, there would be less oil being produced and shipped. On the back, design a poster. Your poster should ask people to use less oil (and gasoline, which is made from oil).
