2.33 (b) (5)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

Section 2.33 (b) Each research facility shall establish and maintain programs of adequate veterinary care that include: (5) Adequate pre-procedural and post-procedural care in accordance with current established veterinary medical and nursing procedures.

1. Review of animal records for Protocol 06-050 that described ophthalmic procedures involving rabbits: The proposal stated that an ophthalmic topical anesthetic, proparacaine hydrochloride, would be used prior to the eye procedure. Available records for rabbit #3, #4, #5, failed to document or provide evidence that a topical anesthetic was used prior to the ophthalmic procedure. Information provided by the scientist to the undersigned APHIS official indicated that a topical anesthetic was not used prior to the ophthalmic procedure.

Preprocedural and postprocedural care should be provided as described in the proposal to conduct an animal activity and approved by the Institutional Animal Care and Use Committee, in order to avoid or minimize discomfort, pain and/or distress to the animals, and to ensure the well-being of the animals.

Correct by: Immediately.

Note: This inspection was conducted at the Upper Providence Site on September 24-25, 2006.
