The Humane Society of the United States: More Than A Pet

Prepared for the Humane Society of the United States by The Harris Poll

March 25, 2024
Methods

Audience

2,042 U.S. adults age 18+ including pet owners (n=1,377)

Mode

The research was conducted online in the U.S. by The Harris Poll via Harris On Demand Omnibus platform on behalf of the Humane Society of the US

Weighting

Data have been weighted to be representative of U.S. adults age 18+

Method Statement (to be included in all press materials)

The research was conducted online in the United States by The Harris Poll on behalf of HSUS among 2,042 U.S. adults. The survey was conducted March 19 – 21, 2024.

Data are weighted where necessary by age, gender, race/ethnicity, region, education, marital status, household size, and household income to bring them in line with their actual proportions in the population.

Respondents for this survey were selected from among those who have agreed to participate in our surveys. The sampling precision of Harris online polls is measured by using a Bayesian credible interval. For this study, the sample data is accurate to within ±2.7 percentage points using a 95% confidence level. This credible interval will be wider among subsets of the surveyed population of interest.

All sample surveys and polls, whether or not they use probability sampling, are subject to other multiple sources of error which are most often not possible to quantify or estimate, including, but not limited to coverage error, error associated with nonresponse, error associated with question wording and response options, and post-survey weighting and adjustments.

Statistically significant differences by subgroup are identified throughout by letter or in yellow callout boxes. For full data breakdowns by all subgroups, see data tables.
Key Findings

- Pets are a part of people’s families, and they are willing to make sacrifices both big and small for these important family members.

- There is a severe lack of awareness about the large numbers of pets currently living in poverty, even among pet owners, with only 28% of Americans being aware of this crisis.

- Even though most Americans are unaware that many pets live in poverty, 39% of owners say there are things they have not been able to pay for that their pet needed. This primarily includes emergency/preventative veterinary care, vaccines, and expensive food/supplements.

- However, the majority of Americans agree that one’s financial situation shouldn’t impact their ability to have a pet as long as they care for them and love them. Moreover, there is agreement that owners shouldn’t have to lose their pet if they fall on hard times financially.

- Ultimately, shelters are overcrowded, and therefore three-quarters of adults agree that socio-economic status shouldn’t prevent pet adoption.

- Regardless of their financial situation pet owners are willing to give up a lot in order to keep their pets. This can range from minor day to day things like foregoing a fancy coffee and/or ordering lunch/dinner, to making major sacrifices like spending less on their own needs, and even taking out loans or going into debt.

- In order to sustain higher levels of pet adoption among those across the socio-economic spectrum, more than 9 in 10 Americans agree that there should supports – similar to those for adults impacted by poverty and inequality like shelters and community organizations – available for pets in need. This should alleviate some of the financial burden on owners.
It is well recognized that pets are full-fledged members of people’s families.

Almost 7 in 10 Americans own a pet, and most, according to a 2023 Pew Research Survey, nearly all consider their pets part of their family.

Pets Owned

- Dog: 50%
- Cat: 35%
- Bird: 4%
- Reptile: 3%
- Rabbit: 2%
- Other: 3%
- None: 32%

According to a 2023 Pew Research Center study, 97% of U.S. pet owners say that their pets are part of their family.
Owners are willing to give up certain daily luxuries and even much larger life tradeoffs for their pets. The majority of owners would sacrifice their own money – by spending less on their own needs – to keep their pet.

91% of Owners Would Make Sacrifices To Keep Pet, Including...

However, pets can be an expensive endeavor, especially when it comes to their healthcare. Over half of owners living below the poverty line have been unable to pay for something their pets need.

Americans agree that one’s financial situation shouldn’t impact their ability to keep/care for a pet. Especially given that shelters are overcrowded and need more people to adopt, regardless of financial status.

No one should have to give up their pet because they fall on hard times financially. Net: 81%

- Strongly disagree: 5%
- Somewhat disagree: 19%
- Somewhat agree: 37%
- Strongly agree: 43%

Overcrowded shelters need more people to adopt pets, regardless of peoples' socio-economic status. Net: 75%

- Strongly disagree: 7%
- Somewhat disagree: 17%
- Somewhat agree: 40%
- Strongly agree: 35%

Poverty / being poor doesn’t make someone unable to care for a pet. Net: 67%

- Strongly disagree: 8%
- Somewhat disagree: 24%
- Somewhat agree: 38%
- Strongly agree: 29%

Pet owners are significantly more likely than Non-Owners to agree

- 84% Owners vs. 75% Non-Owners
- 78% Owners vs. 70% Non-Owners
Moreover, adults agree sharing love and joy with pets should be all that’s needed and accessible to all.

Nearly 3 in 5 **strongly agree** every pet owner deserves to keep their pet if they provide love and care.

All pet owners deserve to keep their pets as long as they provide them with love and care.

Everyone should be able to experience the joy of the bond with a pet.

**Level of Agreement**

- **Strongly disagree**: 4%
- **Somewhat disagree**: 7%
- **Somewhat agree**: 32%
- **Strongly agree**: 58%

Net: 89%

Owners are significantly more likely to agree: **91%** APL vs. **84%** BPL.

Those above the poverty line are significantly more likely to agree: 91% APL vs. 84% BPL.

Owners are significantly more likely to agree: **87%** Owners vs. **80%** Non-Owners.
Only around a quarter of Americans, even pet owners, are aware of the national pet poverty crisis. While numbers are low overall, pet owners are more likely than non-owners to know many owners are unable to afford or access veterinary services.

Awareness

20 million pets are living in poverty, of which 70 percent have never seen a veterinarian.

Americans living below the poverty line are **significantly more likely** to be aware of this crisis: 36% BPL vs. 26% APL
Challenges:
Most people are aware of how poverty and inequality create challenges and barriers to accessing healthy food, education, jobs, health care and housing for people.

In response to these challenges, there are support systems like shelters and community organizations to help people when they fall on hard times.

Americans think it’s important to have similar supports for pets in need.
With about half saying this is very important.

Level of Importance

Having similar support services available for pets that need help.
For example access to vet care, vaccinations, food, pet essentials, etc.

Net: 90%
49% Very important
41% Somewhat important
7% Not very important
3% Not at all important

Owners and those living above the poverty line are significantly more likely to agree
92% Owners vs. 85% Non-Owners
91% APL vs. 86% BPL
